## Handheld Computing Magazine's Best Palm Powered Product of 2001 Awards

Congratulations to the winners and finalists of Handheld Computing Magazine's Best of 2001 Awards. While there are thousands of great products available for our favorite platform, these pages highlight the cream of the crop. These are the programs and add-ons that add new capabilities to the platform, make your job easier, or just make you sit back and say "wow!"

Each category highlights a winner, and a pair of finalists as well. Don't think of these as "runners-up." These are standout products that are winners in their own right.

These awards were announced in early February at the PalmSource conference in San Jose, California. Below you'll find a list containing the finalists and winners in each category. For the full scoop on each of these products, be sure to pick up a copy of our annual awards issue, Handheld Computing Magazine issue 5.1, which will be on newsstands in early March.

### Best New Palm OS Device

**Winner: CLIÉ PEG-N760C**  
*Sony, <http://www.sel.sony.com/>*

**Finalist: Handera 330**  
*Handera, <http://www.handera.com/> [Purchase at PalmGear.com](#)*
