PowerNapping Springboard Module - eXpansys UK

by Ed Daniel★ on 15/07/03 - 05:44

JETLOG 24x7 PowerNapping Springboard Module - eXpansys UK : *All it takes to secure your mission-critical objectives is to snap the module into your Visor handheld while true hot plug&play architecture loads the 24x7 PowerNap application, tap PowerNap, repose your hand on the back of your Visor, and touch an onboard sensor. While you go for a gentle nap JETLOG® takes care of business by preventing negative effects of napping to occur - zero tolerance top performance for you!*

Only in America.... hehehe!

Anyone know of a UK wake-up call service, free preferably.
